

Lit Review Exercise

Three of these* are from my take on the 2-9 lit reviews exercise. The others are here for us to discuss other considerations in creating literature reviews, particularly in light of our programmatic example on collective feedback.

For our discussions, some questions to consider on limiting perspectives:

- TPC specific?
- how much to integrate from other fields such as composition or education?
- general higher ed studies?
- what to do about peer review as formative feedback?
- what about the tech and analytics research?
